G. & R. Summer Grown, Winter Rested, Own Root Roses

Very few persons, even in the trade, realize to what mammoth proportions the own root Rose business has reached in the past few years. Our business has grown by leaps and bounds, and the end is not yet. It's easy to understand why. Because G. & R. own root Roses give satisfaction. They grow and bloom; they work year in and year out; they have permanency. Not the budded Roses that are like "a flash in the pan" and gone. No wonder when the customers know about budded Roses they absolutely refuse to purchase, and no one blames them. Give your customers the best, and the best are G. & R. own root Roses.

Although our stock of Roses for 1915 was several hundred thousand more than we ever grew, still we sold out early in the season and were compelled to turn down orders for three-quarters of a million Roses we could not supply.

One of our customers in Oregon says: "Several years ago we bought your Roses, then we made the attempt to grow them ourselves, then again we tried the California-grown Roses, but we are back with you and we are back to stay. No Roses do so well with us as the G. & R. Rose. We expect to plant more largely of your Roses each year." This is why G. & R. Roses are finding a ready market everywhere they are tried.

Rose After=Satisfaction

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional Roses. Think of it, the after-satisfaction of selling six million Roses, and demanding a million increase in one year. Going some! you say. Yes, but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality Roses. None better, none so good.

Hybrid Tea Roses

Newer Varieties and a Few That are Scarce

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free-flowering qualities. In a sentence, it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect Rose. They are ever-bloomers and hardy in all but the most rigorous climate. in all but the most rigorous climate.

ADMIRAL WARD (Pernet Ducher, 1915)—Vigorous, spreading, erect growth; large, glossy, bronzed foliage; large, full, globular flowers freely and continuously produced. Color crimson-red, shaded fiery-red and velvety crimson. Fine bed-

AUTUMN TINTS (B. R. Cant & Sons, 1914)—Coppery-red shaded with orange and salmon; flowers produced in great profusion. An exceedingly attractive garden Rose. Similar in color to Mme. Edward Herriott. Very lovely.

BARON PALM (Lambert, 1914)—Pure velvety red, flushed deep yellowish-red and vermilion; large, full, and of good substance; fine both for garden culture and for cut flowers.

BRILLIANT (Hugh Dickson, 1914)—Flowers large and full and produced continuously throughout the season in endless profusion. Color the most intense scarlet, the brightest color

fusion. Color the most intense scarlet, the brightest color yet achieved in Roses, the fiery brilliance of which is quite startling. The most brilliant bedding Rose in existence. Gold medal, N. R. S.

CECILE CUSTERS (Leenders, 1914)—Inside of petals lilacrose, reverse deep rose-pink; large flower carried on long stem; growth vigorous and very floriferous. Extra

stem; growth vigorous and very floriferous. Extra.

CHEERFUL (McGredy, 1915)—Pure orange-flame, the flame tints overspreading the petals, giving it a wonderful and pleasing effect. Together with the distinct orange-yellow base, creates a combination of color hitherto unknown in Roses. The blooms are very large and full, of perfect shape and form with orange yetals. tinuously all season. Superb.

CHERRY PAGE (Easlea, 1914)—Brilliant carmine-pink, suffused with golden-yellow at base of petals; flowers very large, with very shapely buds. Growth vigorous; very free-flowering.

ing. Extra.

CHRISSIE MACKELLAR (Alex. Dickson, 1913)—A gorgeously beautiful Rose, combining in charming combination the following tones, tints and colors: Crimson-carmine, deep rich ochrey-madder, becoming a delicate but bright orangey-pink as the flower develops. It is one of the most delightfully color-toned Roses we have had the pleasure of seeing. It is strongly and deliciously pure primrose-tea scented.

college (McGredy, 1914)—Brilliant rose, shaded rose-pink with deeper rose-crimson veneering and distinct creamy-yellow ground never fading until the petals drop. The flower is quite full, with enormous petals and high pointed center, forming the noblest and most remarkable flower among Roses. Very free blooming and smooth. Gold medal Rose of the National Rose Society of England, 1913.

COUNTESS CLANWILLIAM (Hugh Dickson, 1914)—Flowers vers large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peachpink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON QUEEN—A very strong, upright grower, flower large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

EDGAR M. BURNETT (McGredy, 1914)—Very large, full flowers of fine shape and form, with large flesh petals tinted rose. A great improvement on La France, and may be regarded as an advance on the type of Lady Alice Stanley, undoubtedly the sweetest-scented Rose in existence, even surpassing La France in this respect; unequaled in its color as a bedding Rose. Gold medal, N. R. S.

ETINCELANTE (Chambard, 1914) — Bright brilliant red, shaded with purple, large, full and of fine form, opening into an enormous bouquet of fragrance; bud elongated, of brilliant velvety crimson color. Free flowering. Extra fine.

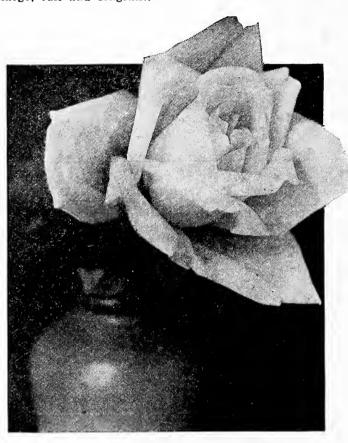

HYBRID TEA ROSES—Continued

FLORENCE FORRESTER (McGredy, 1914)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white, the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, a National Rose Society. National Rose Society.

FRANCIS SCOTT KEY (Cook, 1914)—An American seedling, raised by John Cook. It is a heavy double Rose of great substance. In color, red. It shows good growing characteristics and is undoubtedly a valuable variety. Throughout the summer this Rose was unequaled as a cut Rose and it is proving equally good in midwinter to be an excellent grower, opening perfectly and worthy of unqualified recommendation mendation.

FRAU MATH. NOEHL (Welter, 1914)—Lemon-yellow, large full fine form; fragrant. Buds long and pointed. Very floriferous.

FREIFRAU VONDER GOLTZ (Lambert, 1913)—Rosy-salmon; large, full and fragrant.

Florence Forrester.

G. AMEDEE HAMMOND (Alex. Dickson, 1915)—The color is cadmium or deep apricot egg yolk, shading off to fawn or delicate buff. Blooms large, full, perfectly formed; very floriferous and very fragrant. A great acquisition and a Rose we set great store on.

GOLDEN MEYER (Paul & Son, 1915)—A most charming Rose of a deep golden-yellow. A fine garden Rose and is also valuable as a cut flower. Very free.

GORGEOUS (Hugh Dickson, 1915)—Flowers large and full, exquisitely formed and produced in endless profusion. exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal, N. R. S.

HADLEY (Montgomery Co., 1914)—Hadley is a development from a line of seedlings raised by Alex. Montgomery, Jr., the varieties used in this development being Liberty, General McArthur and Richmond. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-yearround forcing variety.

HELEN TAFT (U. S. Botanical Gardens, 1914)—A rich cerise-pink. Flower very large. A free bloomer and will become as famous as a bedding Rose as is the variety President Taft. Growth very strong. Keep your eye on this variety.

HERZOG JOHANN ALBRECHT (Jacobs, 1914)—Copperyorange on a yellow ground, outer petals changing to clear salmon-rose; large, very full, of fine form, fragrant. Altogether a desirable Rose.

HOOSIER BEAUTY (Dorner, 1915)—We use description of E. G. Hill Co: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close cut state and opens into a magnificent let, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thoroughly established in the soil it sends out long, stiff growths with a bud on every shoot. It does not need to be pinched like Killarney or Richmond, but produces, naturally, stems two to three feet in length; each plant keeps up a very close succession of bloom, and again unlike Richmond it is a good summer Rose. It is a clean grower, shows very little inclination to 'spot' or mildew; indeed, the variety is quite clear of both. It is an easy doer, grows side b, side with Richmond and Killarney, and has become instantly popular and in heavy demand in the four cities where blooms have been sold, flower buyers through the section calling for it by name. We are describing the Rose very fully in reit by name. We are describing the Rose very fully in response to questions asked us by intending rurchasers." We believe this Rose will make its mark as a garden variety.

V. MACHIN (Alex. Dickson, 1914)—A dazzling rose of gigantic size. Its intensely black grained scarlet-crimson blooms we consider unique amongst all Roses. Awarded gold medal, N. R. S., and several other medals for best bloom. A truly magnificent Rose.

IMOGEN (W. Paul & Son, 1915)—Orange-yellow in center, shading towards the edge of petals to pale yellow and creamy-white. A great acquistion to Roses of its color.

IONA HERDMAN (McGredy, 1914)—A pure, clear, orange-flame, the greatest lift in color yet attained in Roses, surpassing Rayon d'Or in clearness and brightness. Without question the most beautiful relleve descriptors. passing Rayon d'Or in clearness and brightness. Without question the most beautiful yellow decorative Rose in existence and a Rose that must be seen in order to grasp its wonderful coloring. The most striking novelty yet raised; it is sweetly scented. Very free-flowering, and of beautiful shape and form. Gold medal, N. R. S.

IRISH FIRE FLAME (Alex. Dickson, 1913)—One of Alex. Dickson's single Roses that is a good forcer. It makes beautiful buds that romain in shape a long time having great

substance. It comes with long stems, and with its unique color, it forms a combination that at once places it in the front rank of forcing Roses. The color is old gold or coppery-yellow, flamed with ruddy-crimson. Certainly a most allowed Roses.

glorious Rose.

JANET (Alex. Dickson, 1915)—A seductive Rose of greatest charm, virtually a bush form of "Gloire de Dijon." In the young stage its color is a delicate egg yolk silky saimony flesh, or golden ochre on very delicate pearly champagnebiscuit fawn. A greatly-to-be-desired-in-every-garden Rose. The nursery rows of this Rose are festooned or garlanded with bloom.

with bloom.

JOSEPHINE (W. Paul & Son, 1914)—Rosy-flesh, base of petals salmon-yellow, large and full, of fine shape; fine both for exhibition and decorative purposes.

KILLARNEY BRILLIANT (Alex. Dickson, 1914)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

Intense but delicately and deliciously Persian tea fragrance. Especially valuable for garden decoration, being a marvelously free and continuous bloomer.

LADY GREENALL (Alex. Dickson, 1914)—Intense saffron-orange, heavily zoned and overspread on deep creamy-white; reflex of petals faintly suffused delicate shell-pink, large, perfectly finished, very floriferous, strongly tea perfumed.

A truly magnificent Rose.

LADY MARY WARD (McGredy, 1913)—Color rich orange, shaded deeper apricot-orange, with a decided metallic veneering; a most remarkable variety, and the greatest novelty in color yet seen in Roses. A bud of this Rose, on account of its wonderful color, would be one of the sights of any Rose garden. Lady Mary Ward is bound to become a great favorite. Gold medal, N. R. S.

LEONIE LAMBERT (Lambert, 1914)—Silvery-rose, shaded

and sweetly scented.

A really magnificent Rose; fragrant. Silver gilt medal, N. R. S.

MRS. ANDREW CARNEGIE (Cocker, 1913)—Sent out by James Cocker & Sons, of Aberdeen, Scotland. This Rose is an epoch-making flower, as an old Kentish grower put it, "a nailer." At the stand where Mrs. Andrew Carnegie was shown there was a big crowd around it all the time the show was open. Queen Alexandra admired it as she passed through the chew in the marriage before the standard with through the show in the morning before the great rush of the afternoon. One enthusiast describes it as having "lit up the whole show." With its handsome shape and delicious fragrance it combines a color that entrances. Pale lemon-yellow at base of the petals, shading to pure white. Won the gold medal, N. R. S.

HYBRID TEA ROSES, Standard Varieties—Concluded

- MRS. WALTER EASLEA (Alex. Dickson, 1910)—A distinct and charming Rose; of imbricated form and robust, vigorous and erect growth. The blooms are large, full, and are most freely produced. The color is a glowing crimson-carmine, which, as the flower expands, deepens to intense crimson-orange; the back of the petals, being an intense satiny-crimson, lends additional charm to this lovely variety.
- MY MARYLAND (Cook, 1909)—One of the finest American introductions. It has jumped into popular favor at once, sweeping the decks of both Europe and America clean. The plant is of strong, vigorous growth. Extremely free flowering, every shoot bearing one or more flowers, which are double; of perfect form. Color, glowing intense pink, which lightens up beautifully as the flower expands. Strongly and delightfully fragrant. It will bear more flowers than any other Rose we know excepting "Grossherzogin Friedrich." After a full test, we can recommend My Maryland as a garden Rose par excellence.
- NATALIE BOTTNER (Bottner, 1911)—Color, delicate creamyellow; a flower of wonderful finish in the way of "Kaiserin;" very vigorous, but nevertheless most floriferous. It combines the prominent qualities of the two celebrated Roses, "Druschki" and "Kaiserin." This novelty is much superior to them.
- NERISSA (W. Paul, 1912)—This Rose was given an award of merit from the Royal Horticultural Society of England. Why they did not give it a gold medal is beyond our ken. An enormously large, full flower, of fine shape, making a magnificent effect in the garden. Creamy-yellow, center tinted peach. A great garden Rose.
- OPHELIA (W. Paul, 1912)—Salmon-flesh shaded with rose; large, and of perfect shape; of excellent habit, the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous. Certainly a glorious Rose. Be sure to have "Ophelia" fixed in your memory.
- OLIVIA (Hill, 1907)—It has more petals in it than General MacArthur, and is a shade lighter in color than Rhea Reid, but has them both backed off of the boards when it comes to free blooming. A superb Rose.
- OTHELLO (Paul & Son, 1912)—Deep blackish-crimson, with pronounced maroon shades; distinctive coloring; large, well formed flowers.
- **PEERLESS** (Lippiatt, 1907)—Almost pure white with pale flesh center; large, full, well formed; very floriferous.
- PERLE VON GODESBERG (Schneider, 1902) The Yellow Kaiserin. This is identical with Kaiserin Augusta Victoria, the peer of any Rose, except in color, being a pure white with yellow center. Exquisitely beautiful.
- PHARISAER (Hinner, 1903) Rosy-white, shaded salmon; large, full, well formed, very floriferous; good.
- PIERRE GUILLOT (Guillot, 1879)—The freest blooming of all the Roses we grow; large, handsome buds and flowers of richest, deepest red. A wonder.
- PRESIDENT TAFT (McCullough, 1908)—It is without question the most remarkable of all pink Roses. It has a shining, intense, deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant, and in a class by itself as to color. Our Mr. Frank Good, who is probably familiar with more Roses than any man in America, says: "Talk all you want to about the Rose President Taft, and then you will not say enough."
- PRINCE DE BULGARIE (Pernet Ducher, 1901)—Silvery-flesh, very delicately shaded with salmon, long bud opening to full cup-formed flowers; a distinct and very charming variety. Mark the prediction, "Prince de Bulgarie" will be in the forefront of all forcing Roses.
- PRINCE ENGLEBERT CHARLES DE ARENBERG (Soupert & Notting, 1910)—Without doubt the most promising red forcing Rose in sight. The color is a clear and lively red without tone of purple that kills all the other red forcers. The color is most pleasing and under artificial light wonderfully brilliant. Growers will make no mistake in planting this Rose heavily.
- PRINCIPAL A. H. PIRIE (Bernaix, 1910)—Silvery-pink with salmon tints and cochineal center. Large and full. A most glorious Rose.

Tea=Scented Roses New Varieties and a Few that are Scarce

The original blush Tea Scented Rose. A variation of the China Rose; was imported from China in 1810. In combination with the Yellow China, or Tea Rose introduced in 1824, it has been the origin of all the splendid varieties we now possess. Tea Roses are distinguished from others by the delightful fragrance of the flowers and by the delicate shades of yellow, nankeen, salmon, copper, wanting in Hybrid Perpetuals. They bloom in great profusion during the entire summer and autumn, being especially fine during the autumn months. These are ever-bloomers; half hardy.

LADY PLYMOUTH (Alex. Dickson, 1914)—A most distinct and meritorious Rose of the "Souvenir de Pierre Notting" type, whose delicate pearly but deep Ivory cream petals are very faintly flushed, giving it a most piquant finish that is difficult to describe. It is delicately pure tea perfumed. Awarded gold medal, N. R. S., and silver medal, Crystal Palace, London.

MRS. CAMPBELL HALL (Alex. Dickson, 1914)—Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral fawn. Very deliciously fragrant. Awarded gold medal, N. R. S.

petals are delicate cadmium old gold; the center petals have a delicate and charming suffusion of delightful, pure rosepink on cadmium orange-chrome. A very intense silk finished apricot. Has a deliciously pervading hybrid-persian perfume.

WHITE SHAWYER (Totty, 1915)—This is a sport from that grand forcing Rose, Mrs. George Shawyer, and like its parent is a glorious forcer. Indeed, some growers claiming that it will supersede all the white forcing Roses. Snow white, of the largest size, and a good keeper. It is a good garden Rose, being a strong, vigorous grower and free bloomer. Don't forget White Shawyer when making up your planting list.

Polyantha or Baby Rambler Roses—Newer Varieties

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay, and any one who attempts to handle Roses without including this class will bump into something real hard. They are useful, either pot grown or for bedding purposes or for hedge effects. Completely hide the plant with bloom from early till late.

BABY FARBENKONIGIN—This is a new baby Rose bearing flowers that in color are same as Farbenkonigin or Queen of Clear pink.

BABY "Baby Tausendschoen." It is a bush form of the "Climbing Tausendschoen." or "Thousand Beauties," having all the charms in the variable coloring in its flowers that its parent has, being firm, white, delicately flushed pink, changing to deep rosy-carmine. This is a splendid Rose. Try it.

CATHERINE ZEIMET, or WHITE BABY RAMBLER (Lambert, 1901)—This is surely a beauty and a great addition to the Baby Ramblers. Grows to a height of twenty inches and produces double pure white flowers in abundance. It has a fragrance similar to Hyacinths, of free, compact growth and very attractive. It produces a sheet of white bloom that is certainly a sight worth seeing.

It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds. Hybrid Perpetual Roses—Newer Varieties

The first Hybrid Perpetuals were grown from crosses between Hybrid China and Tea Scented Roses with Gallica and Bourbon Roses. This is a beautiful class and cannot be too highly recommended, including, as it does, many of the hardiest early and late flowering kinds and nearly all of the superb rich crimson, red and pink varieties which make such pleasing contrasts to the yellow and white Teas. These are hardy.

DUCHESS OF SUTHERLAND (Alex. Dickson, 1912)—A strikingly distinct and beautiful Rose of decided merit, possessing great value for garden decoration. We make this statement advisedly and with a full sense of our responsibility. The Rose is named after the senior member of our firm, who is now approaching his eightieth birthday. We are quite satisfied that within two years George Dickson will be the most popular exhibition Rose in existence. As near as we can describe it, the color is a velvety black-crimson, the back of the petal being heavily veined with deep pure crimson-maroon. The petals are of splendid shape; of magnificent substance; delightfully smooth, and built to make the form of flower perfection. We have We make this statement advisedly and with a full sense splendid shape; of magnificent substance; defigition smooth, and built to make the form of flower perfection. We have regularly had blooms of the highest exhibition standard quite five inches across. fail to try this Rose.

KING GEORGE V (Hugh Dickson, 1912)—What Mr. Dickson himself says of this Rose: "The flower is very large and very full, opening freely; beautifully shaped; much resembling 'Madame Jules Gravereaux' in build of flower and very full, opening freely; beautifully shaped; much resembling 'Madame Jules Gravereaux' in build of flower and petal. The petals are very abundant and nicely arranged. The color is quite unique amongst Hybrid Teas, being rich blackish-crimson, with deep velvety violet flush, a striking and brilliant color, not burning in the sum nor turning blue, as so many of our very dark Roses do. It is very free flowering and perpetual, and delights in a warm sun. The perfume is strong and very pleasing. This is one of the finest novelties which we have ever sent out, and has elicited universal admiration wherever shown. Awarded the gold medal of the Festival of Empire, Crystal Palace, London, June 29, 1911." With us this Rose is a pure Hybrid Perpetual.

We have looked it over in the field and grown it in pots for the market, and we absolutely cannot detact a single fault in it or about it. The growth and

"White Druschki." We have looked it over in the field and grown it in pots for the market, and we absolutely cannot detect a single fault in it or about it. The growth and make-up of the plants is superb, while the delicate pink color is unapproachable. Thank you, Mr Hinner. You have enriched our Rose collection for all time. You know what some of you have missed by delaying so long in getting acquainted with "Frau Karl Druschki." Do not repeat this mistake with "George Ahrends."

Hardy Climbing Roses Newer Varieties and a few that are scarce

Including the Ramblers, Cl. Polyanthas, Wichuraiana, Multifloras, Hybrid Noisettes, Setigera and Climbing Chinas.

These Roses are suitable for planting where they can climb on walls, fences, galleries, porches, pillars, pergolas, arches, etc.; in fact, wherever a hardy climber is required. This list includes the Ramblers, Climbing Polyanthas, Wichuraianas, etc.

AMERICAN PILLAR (Conard, 1909)—(C. P.) A single flow-ering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn. A great Rose to grow in pots for Easter.

BRAISWICK CHARM (Frank Cant, 1914)—(W.) For arches, pergolas, or for screens this variety is undoubtedly foremost. Deep orange-yellow bud shading almost to white on the outer petals as the flower expands. The nearest approach to the perpetual flowering Wichuraiana.

CLIMBING AMERICAN BEAUTY (Hoopes Brothers & Thomas, 1911)—(H. N.) A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." This Rose has already made its mark, and wherever it has been planted it has pleased, its mark, and wherever it has been planted it has pleased, until today we sell it by the tens of thousands. You lose if you are slow to take hold of the "Climbing American Beauty." It grows and blooms.

CHRISTINE WRIGHT (Hoopes Bros. & Thomas, 1913)—(W.) A most exquisite new Rose, a cross between Caroline Testout and an unnamed seedling; it is of strong climbing habit, with large, heavy, dark green foliage, which is immune to disease. The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud and in the fully expanded flower; in color a most refreshing bright wild-rose pink; it flowers profusely during June, and continues more or less flowers profusely during June, and continues more or less throughout the season.

ORIFLAME (Paul & Son, 1914)—(C. P.) Bright vivid rose, suffused with coppery-gold borne in bunches of numerous flowers with bold, fountain-like sprays. Extra.

SHOWER OF GOLD (Paul & Son, 1910)—(W.) This variety produces masses of flowers in large clusters. The color is a deep golden-yellow, with orange shadings in the center. Enormous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (Henderson, 1910)—(W.) Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. These flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. Dense, dark green foliage and many large bunches of flowers. Very vigorous.

WICHMOSS, or "BABY MOSS" (Barbier, 1912)—(C. M.)
This is a wonderful break in new Roses, being a cross between the "Wichuraiana" and "Moss Rose." It has retained the scandent habit of the "Wichuraiana," making long growths five to eight feet in length with the glazed resistant foliage, while the bud is heavily mossed in bright green and has the peculiar aromatic odor of the moss family. The flowers are borne in clusters that are a daybreak-pink in color, opening into bloom that is a good semi-double in fullness. A climbing moss is a wonder, and "Wichmoss" is the forerunner of an entirely new family of Roses; hardy.

Everyone knows how Baby Rambler is always in bloom. This is simply a climbing form of Baby Rambler, embracing all its good qualities.

Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color it is brilliant, ruby-carmine, with a clear white eye and a mass of golden stamens; strong, vigorous growth, with bright green, glossy foliage, which is retained until late in fall.

LADY GAY (Walsh, 1903)—(W.) Flowers of a deep cherrypink, shading on the edge of the petals to a very delicate soft tone of pink. Will cover a large porch or trellis in an incredibly short time. Extra fine.

MADAME ALFRED CARRIERE (Schwartz, 1879)—(H. N.) Pure white, suffused with yellow at base of petals; very free and very fragrant; fine for arches and pillars. In Ohio this is a wonderful Rose, completely hiding itself with flowers. In Oregon it grows to the roofs of two-story houses, covering the entire side or end of a large sized house, and simply a

the entire side or end of a large sized house, and simply a wilderness of blooms.

MARY WASHINGTON (Origin unknown)—(Mtf.) Pure white, perfectly double, in immense clusters; fine.

PHILADELPHIA RAMBLER (Conard, 1902)—(C. P.) Glowing crimson; large clusters; fine; several shades darker in color than Crimson Rambler.

PRAIRIE QUEEN (Feast, 1843)—(S.) The old standby red climber. It is so hardy that it delights in the climate of

Alaska and Canada

Alaska and Canada.

RED DOROTHY PERKINS, or EXCELSA (Walsh, 1909)—(W.)

It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler flower on glossy, varnished Wichuralana foliage. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather, and its defoliation by insects; the infusion of Wichuralana blood assures an ornamental climber

which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

Crimson Ramblers.

RUSSELL'S COTTAGE (Origin unknown)—(Mtf.) Dark red; double and full; very hardy.

SEVEN SISTERS (Origin unknown)—(Mtf.) Crimson to white and all intermediate shades; extra. An old favorite.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (Schwartz, 1906)—(C. P.) A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring; beautiful; will become as famous as Crimson Rambler or Dorothy Perkins. We wrote the above a year ago. and now we can add that this Rose is sweeping the country like a prairie fire. Simply a wonder.

TENNESSEE BELLE (Origin unknown)—(Mtf.) Beautiful

TENNESSEE BELLE (Origin unknown)—(Mtf.) Beautiful pink; free bloomer; an old standby.

TRIER (Lambert, 1904)—(C. P.) Large clusters of creamywhite blooms, with dark yellow anthers, flowering freely;

VEILCHENBLAU, THE BLUE ROSE (Schmidt, 1909)—(C. P.)
This is a much better Rose than some give it credit for. It

This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (B. R. Cant, 1908)—(W.) It has been the cry of nurserymen for years for a white climber that would rank up with Crimson Rambler, and now we have the pleasure of offering this White Dorothy Perkins, that in every way is the equal, if not superior, to Crimson Rambler as a red, and Dorothy Perkins as a pink. This Rose has no rival as a white climber.

YELLOW RAMBLER, or AGLAIA (Lambert, 1896)—(C. P.) Bright yellow changing to canary-yellow; produced in pyramidal clusters of fifty or more blooms.

Moss Roses

These are probably a sport of the Cabbage Rose. The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE (Rowe, 1866)—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN (Portner, 1863)—Large, full flower of deep

red; well mossed; fragrant.

MOUSSELINE (Robert and Moreau, 1881)—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE (Laffay, 1845)—Deep blush-pink with buds that are thoroughly mossed.

Miscellaneous Roses

Under this heading are listed all the Roses not embraced in the different families or types that we name in the preceding pages. AMOENA,

MOENA, The Pink Flowering Cherokee Rose (Hockbridge, 1909)—(L.) This wonderful beautiful new Laevigata or Cherokee Rose, was raised in California, and it will sweep the state like wild-fire when it is once known. The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden-yellow center. Resembles huge apple blossoms. Stock scarce. We have a fine lot.

ARTHUR R. GOODWIN (Pernet Ducher, 1909)—(A. B.) This is a genuine "Pernetiana," and is perfectly hardy everywhere. The color is coppery orange-red, passing to salmonpink as the flowers expand. A superb combination of color; flowers medium to large and full. Should prove a valuable garden Rose.

DOUBLE LAEVIGATA, or the Double Flowering Cherokee (California, 1900)—(L.) A beautiful hardy Rose, bearing double white flowers; very fine. Foliage is very distinct.

LAEVIGATA, the Single White Cherokee Rose (Lindley, 1820) This is the famous Cherokee Rose so well known in California. Large, pure white flowers with center filled with golden-yellow anthers.

golden-yellow anthers.

MADAME EDWARD HERRIOTT (Pernet Ducher)—(A. B.)

"The Daily Mail Rose." Winner of the gold cup which was offered by the London Daily Mail, for the best new Rose, exhibited at the International Horticultural Exhibition, held in London, England, May, 1912 (this was the greatest horticultural exhibition ever held) and to be known as the Daily Mail Rose. In competition with the world's greatest rosarians for this much coveted prize was awarded to M. Pernet Ducher for this wonderful novelty. It was again exhibited in London on May 1, 1913, at the exhibition of the National Rose Society of England, where it was awarded the Society's gold medal. M. Pernet Ducher describes its color as follows: "Buds coral-red, shaded with yellow at the base, the open flowers of medium size, semi-double, are of a as follows: "Buds coral-red, shaded with yellow at the base, the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rosy-scarlet, passing to shrimp-red." A wonderful Rose. The bud is long, slender and pointed, the color is like sunshine on a copper-

MADAME GEORGES BRUANT (Bruant, 1888)—(R.) Paper

white, larger, very free and distinct, flowering in clusters; most beautiful.

NEW CENTURY (Conard, 1891)—(R.) A grand Rose that is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time. Extra fine for nurserymen

SIR THOMAS LIPTON (Conard, 1905)—(R.) The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant, borne on long stems continuously throughout the season. Absolutely hardy everywhere. Splendid for hedging, cemetery

and park work.

VISCOUNT ENFIELD (Pernet Ducher, 1910)—(A. B.) Coppery old-rose, shaded with yellow. The inner petals are deeply tinted with carmine, while the center ones are sometimes striped with yellow. Flower large, full, elongated;

very floriferous.

WHITE BANKSIA, or Lady Banks (Keer, 1807)—(L. B.) A vigorous grower, in California growing to the top of tall trees and completely enveloping the entire tree; small double, pure white flowers in clusters, with true violet fragrance. Indeed, if one were blindfolded, he could not detect the odor

from Violets. Very desirable.

WICHURAIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886)—(W.) It is difficult to conceive anything more appro-WICHURAIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886)—(W.) It is difficult to conceive anything more appropriate, beautiful and enduring for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. The flowers are produced in lavish profusion in July. They are single, pure white, with a golden-yellow disc, five to six inches in circumference. It is also immensely valuable as a Climbing Rose, covering arches, fences, etc.

WILLOWMERE (Pernet Ducher, 1913)—(A. B.) Color rich shrimp-pink, shaded yellow in the center, and toning to carmine-pink towards the edges of the petals. Vigorous growth, and erect, branching habit. Long carmined coral bud on long, stout flower stalks. Very large flower, full, and of elongated cup shape. A superb Rose.

YELLOW BANKSIA, or LADY BANKS (Damper, 1827)—(L. B.) Same as White Banksia, except color of bloom is sulphur-yellow. Has the same delicious Violet fragrance.

For Spring Delivery

The King of Flowers Herbaceous Peonies Hardy Everywhere

The demand for fine Peoples is growing with each year, and every florist should have at least a small plantation of them from which to supply his trade, both for the plants and for cutting the bloom. One can make no more profitable investment. The bloom, if cut in the bud state, lasts for a week or more. We offer as choice a list of Peonies as you will find in this country. To the collector, the varieties named will be attractive. To those who wish to increase their stock of desirable sorts this list will appeal, and to the nurseryman and dealers who buy to sell, there will be found a list of choice varieties at moderate cost. We started some years ago to grow Peonies, and we believe that no firm in this country has such a large planting of valuable sorts as we. Our endeavor is always to lead and not to follow in any branch of the floral business we undertake. We will make Good & Reese Peonies as much of a household word as G. & R. Roses, so do not forget us when in need of Peonies. We can supply them (referring to the price) from the aristocrat to the plebeian. We guarantee our rom the aristocrat to the plebeian. We guarantee our Peonies true to name. The plants we offer are divisions (from plants two to three years old) with two to five or more eyes. We always give value. We supply six at dozen, 25 at hundred, and 250 at thousand rates. For any varieties not listed, write us for prices.

SPECIAL NOTICE:

We issue a special Price list of many varieties of Peonies not listed in this book, both new and old varieties. Write today for it.

Peonies for Pleasure

The little brochure, "Peonies for Pleasure," gives full information of the history of the Peony, the only plant that has a registered list of named varieties for over fourteen hundred

years.
"Peonies for Pleasure" tells how and when to plant, the soil and plants to use; fertilizers, and how to apply. It names the early, medium and late varieties for long succession of bloom. It describes the old and new, the plebeian and the aristocrat, of the Peony family.

The early red, white and pink Peonies of our grandmothers' gardens are almost the only ones generally known. Dear patrons, these are the plebeians of the family; if you wish to know the Peony aristocrat, send for this little treatise.

To all interested in the Peony a copy will be mailed on application.

Size of Roots

At the prices quoted in this list we send divisions with from two to five eyes. Should you require larger roots write us for prices, stating size roots desired. We always give value.

Some of the Finer Peonies And Some Varieties That Are Scarce.

Our collection of Peonies comprises the finest sorts obtainable, varieties combining beauty of form, with fullness, large size and clear color. In the matter of form especially the modern Peony delights the eye and compels admiration; many of the old garden varieties had no more beauty of build than a shuttlecock, depending wholly upon size and color to attract. The varieties here listed are as symmetrical and as graceful as the highest types of Roses and Chrysanthemums, and are absolutely free from coarseness. Remember, for a fuller description of these Peonies. see our brochure, "Peonies for Pleasure," mailed on application.

convex bloom, as perfect in outline and contour as a Show or Fancy Dahlia flower. The petals are imbricated like a Carnation, and overlap each other. The color is best described as an even, delicate seashell-pink, an unusual shade for a Peony, and is unapproachable in this regard by any other variety. This grand Peony has all the points of excellence. A most striking flower. Dozen, \$5.00; hun-dred, \$40.00; thousand, \$350.00.

often confused. Dozen, \$4.00; hundred, \$30.00; thousand,

FELIX CROUSSE (Crousse, 1881)—All Peony enthusiasts are familiar with the fact that it is difficult to get a red Peony that is a self-color; that is to say, a full, rich, even shade of red without being suffused with violet, purple or crimson shades. Felix Crousse fills the bill. Its large, globular flowers, solid and compactly built from edge to center, are a rich, even, brilliant, dazzling ruby-red. Exceptionally fiery, bright and effective. Both the color and size are startling. We place this in the front rank of all the red Peonies. As a general purpose red none better. When first planted the blooms come single, but after becoming established it is semi-double. 48—MONSIEUR JULES ELIE (Crousse, 1888)—This is king of all Peonies, and is without question M. Crousse's masterpiece. Color, an ideal glossy lilac-pink, shading to a deeper rose at the base of the entire flower, overlaid with a sheen of silvery-rose that fairly dances and shimmers in the sunlight. An unapproceduable verifier, from any standarding of silvery-rose that fairly dances and shimmers in the sunlight. An unapproachable variety from any standpoint. When cut in bud a good keeper, thus is fine for cut flowers. Blooms about the same time as Festiva Maxima, maybe a couple of days later. Our planting comprises some twenty thousand plants. Warning—Do You Know About the Fern Scale

If you don't, you had better get acquainted

About every dealer in the land has this Fern Scale. That's what is making your Ferns look so sickly, and what is so serious about the whole matter is that even the big growers think it is a fly, and even then do not know how to rid themselves of it. It is a scale, and the most vicious insect that ever attacked any plant. It is the most difficult to get rid of. Our stock is clean because we know how to prevent it, and we also know how to get rid of it, should our stock ever become infested. You cannot afford to attempt to grow Ferns that have this scale, because you will fail; your plants will never look right. Buy G. & R.

The Grand New Dwarf Fern "Teddy Junior"

"TEDDY JUNIOR," the Fern for every household-This magnificent Fern has never before been offered for sale by any florist or catalogue firm. It is a sport from the now famous Rooserolt Fern, and while its habit of growth is to pro-duce a shorter frond, it re-tains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinna are distinctly undulated, giving the frends an attraction. giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect;

and thin, scraggy foliage is never seen in this variety. "Teddy" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot, while twelve to fifteen is the average number of fronds which other varieties will produce in the same size pot. It is such a compact, vigorous grower that it will thrive under fronds which other varieties will produce in the same size pot. It is such a compact, vigorous grower that it will thrive under most adverse conditions, making an exceptionally rapid growth and producing a plant of rare beauty and perfection in the average dwelling house without special care or attention. Owing to its habit of producing the great quantity of massive foliage in small pots, this Fern makes the finest pedestal plant ever produced, and will prove indispensable for decorating dining room or library tables and numerous other places in the home where limited space will not permit using larger pots or varieties with longer fronds. As a table decora-

varieties with longer fronds. As a table decora-tion, Fern growers can appreciate the commer-cial value of a dwarf variety that will produce forty to fifty fronds twelve to fifteen inches long iorty to fifty from twelve to fifteen finches long in a four-inch pot. Such plants could readily be disposed of, and every grower can produce them from "Teddy Junior" with as little care and expense as they can grow other varieties. Two and one-quarter inch pots, 75 cents per dozen; \$5.00 per hundred; \$45.00 per thousand.

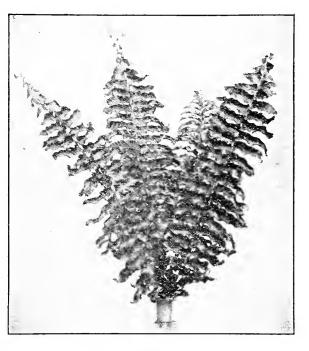

Nephrolepis Whitmanii

The Ostrich Plume Fern

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than the Boston Fern, which has had the most phenomenal sale of any decorative plant that has ever been grown, but which cannot be compared to the Ostrich Fern for beauty and general effectiveness. Everyone who has seen it is charmed with it. As someone expressed it, There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many years." It has taken gold medals wherever shown. Two and one-quarter inch pots, 60 cents per dozen; \$4.00 per hundred; \$35.00 per thousand.

"Teddy Junior," the Wonderful New Fern.

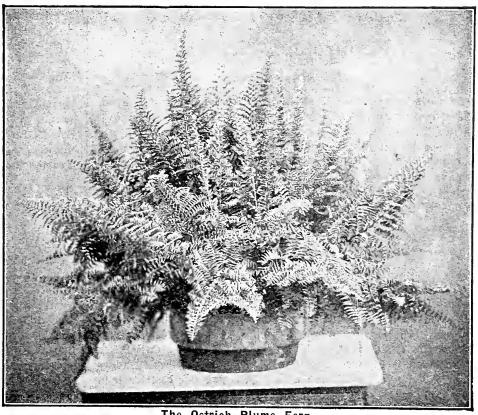

Fronds of the New Fern, "Teddy Jr."

Nephrolepis Elegantissima

The Philadelphia Lace Fern

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. Two and one-quarter inch pots, \$4.50 per hundred; \$40.00 per thousand.

The Ostrich Plume Fern

Nephrolepis John Wanamaker

"The Wanamaker Boston Fern"

A "sport" from Nephrolepis Scholzeli, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzeli, and therefore does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Nephrolepis. Two and one-quarter inch vots, \$6.00 per hundred; \$55.00 per thousand.

Nephrolepis Splendida

The Big Four Fern

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." This is the strongest grower of the Nephrolepis. Do not think of this Fern as a runback. It is not. We have no hesitancy in saying that this is the most valuable of all the Nephrolepis for the local florist. It well deserves the name of "Big Four Fern." Everyone who sees it goes "daffy" about it. This is without question the most splendid of all the Nephrolepis. Be sure and try it. Two and one-quarter inch pots, 60 cents per dozen; \$4.00 per hundred; \$35.00 per thousand.

Nephrolepis Piersonii

The Gold Medal Fern

This Fern received a gold medal from the Society of American Florists and Ornamental Horticulturists, and is the only gold medal ever awarded by them for any plant whatsoever. An entirely new form of the Boston Fern. The pinnae subdivide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed in one, giving the plant a graceful, feathery and plumy effect. Two and one-quarter inch pots, 60 cents per dozen; \$4.00 per hundred; \$35.00 per thousand.

Nephrolepis Scotti

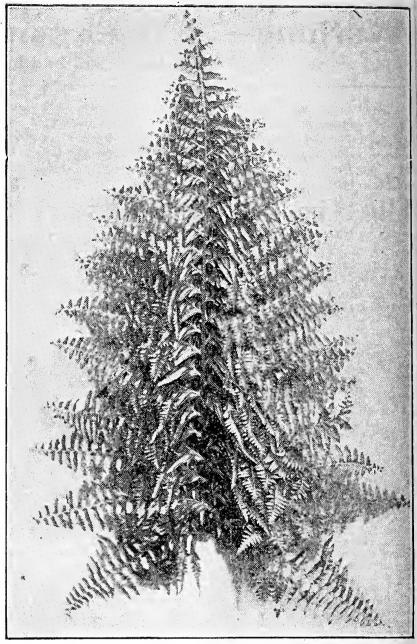

The Newport Fern

Of much dwarfer and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteeninch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. Two and one-quarter inch pots, 75 cents per dozen; \$5.00 per hundred; \$45.00 per thousand.

Nephrolepis Exaltata

The Old Original Sword Fern

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprung. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Two and one-quarter inch pots, 50 cents per dozen; \$3.50 per hundred; \$30.00 per thousand.

The "Baby's Breath Fern," Nephrolepis Goodii.

Nephrolepis Superbissima

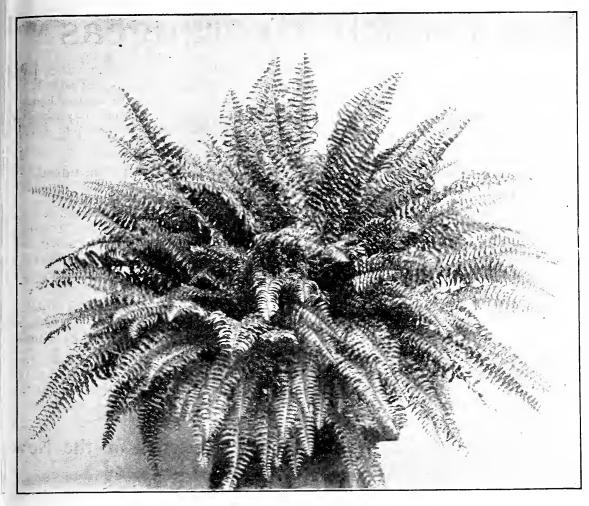

The Fluffy Ruffles Fern

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth being much more compact, and its irregular shaped fronds which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds, firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Two and onequarter inch pots, 75 cents per dozen; \$5.50 per hundred.

Nephrolepis Goodii

The Baby's Breath Fern

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well-grown specimens of any size. Our reputation for it that no Fern in existence can compare with Baby's Breath in flufflness. Two and one-quarter inch pots, 75 cents per dozen; \$5.50 per hundred; \$50.00 per thousand.

Nephrolepis "Roosevelt."

Nephrolepis Scholzeli

The Crested Fern

It is a sport from Scotti, possessing the merits of that most popular variety, but with the pinnae subdivided, giving it a fine crested appearance. The fronds, like in Scotti, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow. The smallest salable plants perfectly express the type, and in every size are models of beauty for table decorations. Two and one-quarter inch pots, 60 cents per dozen; \$4.50 per hundred; \$40.00 per thousand.

Nephrolepis Bostoniensis

The Boston Fern

In the vicinity of Boston no other plant is so extensively used as this graceful Nephrolepis, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared to the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. Two and one-quarter-inch pots, 60 cents ver dozen; \$4.00 per hundred; \$35.00 per thousand.

Nephrolepis Davallioides Furcans

The Fish Tail Fern

This is a grand Fern, entirely distinct from any of the other varieties of Nephrolepis. Throughout the South and especially at New Orleans, this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the Nephrolepis. Grand for house culture. Two and one-quarter inch pots, 60 cents per dozen; \$4.50 per hundred; \$40.00 per thousand.

The Grandest Fern of the Age Nephrolepis "ROOSEVELT"

IMPORTANT — Some firms are offering a Fern which they claim is nearly as good, or similar to, or would be as good. But in the face of these statements we claim as a maker of young plants, and oroducer of more fronds in four and sixinch pots, and attractive appearance, the Roosevelt has all other varieties beat a mile. If you are against the art of renaming or substitution, and want the genuine Roosevelt, best Fern ever produced, come to headquarters.

It is our good fortune and great pleasure to offer this wonderful new Fern. In general characteristics it resembles the world-famous Boston Fern, but will sweep that Fern from the boards for two reasons; it produces many more fronds than the Eoston, thus making a bushier, handsomer plant. In fact, it is the best Fern for florists' use ever introduced. Roosevelt will make a better plant in a six-inch pot than any other Fern in a teninch pot. That is what will make you money every time. The usual size to sell a Boston Fern is from a six-inch pot. Well, let us tell you that in a six-inch pot of the Roosevelt and the Boston there is no comparison. The Roosevelt doubles the fronds of a Boston in a six-inch pot, thus making a much more finished

Boston in a six-inch pot, thus making a much more finished plant, and, therefore, more salable. The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants, a far greater number than was ever sold of a new Fern. Two and one-quarter inch pots, 75 cents per dozen; \$4.50 per hundred; \$40.00 per thousand.

Nephrolepis Whitmanii Compacta

The Parlor Fern

This is a condensed form of the "Ostrich Plume Fern," with valuable characteristics added which are not evident in the parent; the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description. Two and one-quarter inch pots, 60 cents per dozen; \$4.50 per hundred; \$40.00 per thousand.

The New French Hydrangeas

Let us tell our friends that these new French Hydrangeas are the most meritorious plants brought out in years. They have enormous trusses of bloom that completely hide the plant. They are half hardy and may be planted outdoors in the latitude of Philadelphia and in the Gulf and Pacific states. They are also fine as house plants, blooming in the spring time about Easter. These plants are especially valuable to the florist, as in a four-inch pot even they throw up an enormous head. Buy them in the fall, pot up in a cool house and bring on gradually. They are very easy to manage. Anyone can bring them into flower. The varieties we offer are the cream of the lot.

Price, except where noted, two and one-quarter-inch pots, 60 cents per dozen; \$4.00 per hundred.

Three-inch pots, \$1.00 per dozen; \$6.00 per hundred.

Perhaps no other plant has attracted so much attention in the last two years as the Justicia, or Brazilian Plume Plant. The Wonderful Lemon Ponderosa

A Fine Pot Plant for Florists' Sales

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is the true ever-bearing variety. On a plant six feet high no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit in all

Ponderosa Lemon.

stages of development, from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not uncommon to make twelve lemon pies from one Lemon. We have the entire stock of this ponderous Lemon, and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow his own Lemons; it will fruit freely each year.

(From the Houston Post, December 9, 1906.)

Ponderosa Lemon

Harry Adams, landscape gardener for the Sunset at San Antonio, has presented Colonel T. J. Anderson a monster Ponderosa Lemon from the Sunset tropical botanical gardens at the depot in that city. There were thirty-eight lemons on this tree, and the one sent is one of the largest, weighing about three pounds. It is estimated that this single lemon will make two gallons of good lemonade, or two barrels of the circus variety, or material for two dozen lemon pies, or sour enough to impart flavor to one hundred and fifty sour toddies, or lemon peel sufficient to decorate two hundred cocktails. Colonel Anderson sent the monster Lemon to the office of Traffic Manager C. K. Dunlap.

Lilies for Fall Planting

Lilium Giganteum

The True Bermuda Easter Lily

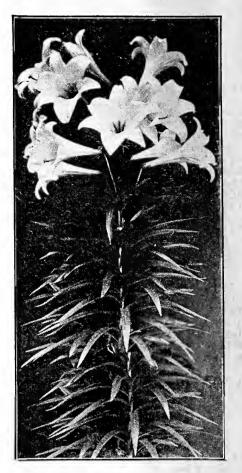

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and other special occasions, makes them invaluable. Flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals during the winter. The quantity of bloom produced is marvelous. Blooming plants in pots form typical Easter offerings and presents, for decoration of window, table, house or church. Five to seven-inch bulbs, 7 cents each; 60 cents per dozen.

Lilium Candidum

The old-fashioned pure white garden Lily, also known as Easter Lily, or Annunciation Lily. One of the hardiest. Flowers snow-white, with heavy yellow stamens and sweetest fragrance. It bears from five to twenty blossoms. This is the most decided variety we have in expressing its preference for a planting time. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. The bulbs are sometimes kept in cold storage for spring sales, but never do quite so well. Customers will do well to plant a bed of twenty-five or more for a permanent bed or border. 10 cents each; 75 cents per dozen; \$6.00 per hundred.

Lancifolium Album

One of the most beautiful of all Lilies. Pure white and very fragrant. 10 cents each; \$1.00 per dozen; \$7.00 per hundred.

The new bulbs are brought from Japan for us each year, and only such will give best results. They are shipped to us wrapped in a ball of clay, and arrive plump and sound, every one ready to bloom. Fine bulbs, 10 cents each; \$1.00 per dozen; \$7.50 per hundred.
